SUMMARY

Flutter Developer with 3+ years of experience building scalable cross-platform mobile applications using Dart and Flutter. Skilled in Clean Architecture, modular code structure, and state management solutions, with hands-on experience in REST API integration and performance optimization. Focused on delivering reliable, maintainable, and user-centric mobile applications.

EXPERIENCE

Flutter Developer

Esparkbiz

September 2023 - Present, Ahmedabad

- Developed scalable cross-platform applications using Dart and Flutter, reducing development time by 20% and improving user satisfaction by 15%.
- Optimized features for better performance and user experience, contributing to a 95% on-time release rate.
- Implemented Clean Architecture and modular design to enhance scalability and maintainability.

Software Developer Intern

Esparkbiz

January 2023 - September 2023, Ahmedabad

- Contributed to feature development, bug fixes, and code refactoring, improving codebase maintainability by 30% and enhancing application stability.
- Followed Agile methodologies and Git-based workflows to ensure smooth collaboration and efficient release cycles.
- Optimized UI and performance in collaboration with the development team, driving a 25% increase in user engagement within three months.

PROJECT

Dyshez

- Developed a scalable cross-platform food delivery application using Flutter, delivering an intuitive and high-performance user experience across mobile platforms, with Supabase powering authentication, database management, and real-time order handling.
- Streamlined restaurant operations by providing a dynamic admin interface to manage menus, pricing, and order tracking, allowing outlets to engage directly with customers.
- Designed and implemented a Rewards & Loyalty System, allowing users to earn points on each order, redeem discounts, and receive personalized promotional offers — significantly improving repeat purchases and user retention.

Smackdab

- Developed Smackdab, a sales productivity tool that improved team efficiency by 40% and increased overall sales by 25%.
- Built dynamic, reusable UI components and integrated a custom calendar module, boosting user engagement by 30% and improving scheduling efficiency by 20%.
- Engineered a responsive, modular layout optimized for mobile and tablet devices to enhance usability and workflow adaptability.

Goals

- Developed Goals.com, a CRM application for goal tracking and incentive management, driving a 30% increase in sales performance.
- Optimized network and asynchronous operations, reducing processing time by 25% and improving application responsiveness.
- Integrated Firebase Cloud Messaging (FCM) and optimized image loading, increasing user engagement by 15% and improving performance by 20%.

EDUCATION

Bachelor of Engineering

Shantilal Shah Engineering college Bhavnagar • 2023 • 8.89

HSC

Sorath International school Junagadh • 2019 • .68%

SKILLS

Flutter, Dart, Clean Architecture, BLoC/Cubit, GetX, REST API Integration, Firebase, Supabase, State Management, Performance Optimization, Modular Architecture, Git, CI/CD, Hive, SQLite.
